(+91) 9101539405/9954735482

I am a fullstack developer, Good at design and problem-solving and a quick learner. I have experience in writing clean and efficient backend code and functional front-end UI. Aggressively looking for work opportunity which is both challenging and rewarding.

## EXPERIENCE

[Spinfin interactive solutions](#), Bangalore — *Software Developer*

DECEMBER 2015 - PRESENT

## EDUCATION

**Tezpur Central University**, Tezpur — *MCA*

AUGUST 2012 - JUNE 2015

**Jorhat Institute of Science and Technology**, Jorhat — *B.Sc(IT)*

AUGUST 2008 - JUNE 2011

## PROJECTS

**Alere Learning XChange** - [Alere Toxicology](#)

Alere Toxicology performs laboratory services for all 50 states in US and throughout the world. Learning XChange is a on demand training service. It provides online training for client to perform effective drug screening. User can take a test using the platform and after passing the test, he/she can get a certificate of completion or laboratory license depending on the course taken.

For this project I have implemented new features, fixed both frontend and backend bugs, optimized DB queries, extensively worked on the "online test" frontend module to enhance user experience and fix cross browser issues.

*Tech used:* **ASP.Net MVC3, JavaScript, jQuery, HTML, CSS, Ajax, SQL Server, Entity Framework, LINQ**

## SKILLS

- **Software Development**
- **Web Development**
- **Design patterns**
- **ASP.NET MVC/CORE**
- **SQL Server Databases**
- **JavaScript**
- **NodeJS**
- **Angular 4**
- **HTML5/CSS**
- **Version Control/Git**

## LANGUAGES

- English
- Hindi
- Assamese

## Mobile Health Manager - [Janssen](#)

Mobile Health Manager (Now Care4Today™) aims to support users who take a medicine regularly, specially people with long-term conditions, by helping to remind them, and their families and carers, which medication they should be taking and when. The app is available both for android and IOS.

I worked as a backend developer on this project and was responsible for maintaining the service as well as many feature additions and bug fixes.

*Tech used:* **Spring MVC, Java, Rest, JSON, jQuery, Ajax, HTML, JavaScript, CSS, Bootstrap, Responsive Web Design, Html5**

## Care4Today™ - [Janssen](#)

Mobile Health Manager is rebranded to Care4Today recently. As part of the rebranding the backend was entirely rewritten too. I was assigned the task of migrating users of legacy platform to the new platform reliably, for that I have created a web-based utility using which the user can migrate their data to new platform very easily.

*Tech used:* **Spring MVC, Java, Rest, JSON, jQuery, Ajax, JavaScript, HTML5, CSS, Bootstrap**

## NocDoc

This project is currently under development. This is a web-based service for providing nursing training, certification and job online. I have worked as a frontend developer for this project and have successfully completed initial layout and views using latest version of Angular framework.

*Tech used:* **ASP.NETCORE, MS SQL Server, C#, Linq, Angular 2+, jQuery**
